Classified

### Section 3. Ingredients

CAS	Ingredient Name	Weight %
64742-46-7	Distillates (petroleum), hydrotreated middle	5% - 10%
7631-86-9	Amorphous silica	5% - 10%

Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First-aid Measures

Ingestion Get medical attention.

Inhalation Remove to fresh air. No first aid should be needed.

Skin Contact Remove from skin and wash throughly with soap and water or

waterless cleanser. Get medical attention if irritation or other ill

effects develop or persist.

Eye Contact Immediately flush with water for 15 minutes. Seek medical

attention.

Comments Treat according to person's condition and specifics of exposure.

### Section 5. Fire Fighting Measures

Suitable Extinguishing Media Unsuitable Extinguishing Media Hazardous Decomposition Products

Unusual Fire or Explosion Hazards Special Fire Fighting Procedures

Extinguishing Media

Flammability Limits in Air Auto-ignition Temperature Comment N/A

N/A

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Carbon oxides and traces of incompletely burned carbon compounds Formaldehyde Hydrogen Silicon dioxide Metal oxides Nitrogen oxides Chlorine compounds

Self-contained breathing apparatus and protective clothing should be worn when fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan. Use water spray to keep fire exposed containers cool. On large fires use dry chemical, foam, or water spray. On small fires use carbon dioxide, dry chemical or water spray. Water can be used to cool fire exposed containers. Not determined

Not determined

When temperatures above 150<sub>i</sub>C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer, and an irritant to the eyes, nose, throat, skin and digestive system. Safe handling conditions may be maintained by keeping

vapor concentrations within the OSHA Permissible Exposure Limits for formaldehyde.

### Section 6. Accidental Release Measures

Steps to be taken in case of spill or release

Determine whether to evacuate or isolate the area according to your local emergency plan. Observe all personal protection equipment recommendations described in Sections 5 and 8. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. For small spills, wipe up or scrape up and contain for salvage or disposal. Clean area as appropriate since spilled material, even in small quantities, may present a slip hazard. Final cleaning may require the use of steam, solvents or detergents. Dispose of saturated absorbent or cleaning materials appropriately, since spontaneous heating may occur. Local, state and federal laws and regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which federal, state and local laws and regulations are applicable. Sections 13 and 15 of this MSDS provide information regarding certain federal and state requirements.

### Section 7. Handling and Storage

Handling

Use adequate ventilation. Product evolves acetic acid when exposed to water or humid air. Provide ventilation during use to control acetic acid within exposure guidelines or use respiratory protection. Avoid eye contact. Avoid skin contact. Keep container closed. Do not take internally. Avoid breathing vapor.

Storage

Use reasonable care and store away from oxidizing materials. Keep container closed and store away from water or moisture. This material in its finely divided form presents an explosion hazard. Follow NFPA 654 (for chemical dusts) or 484 (for metal dusts) as appropriate for managing dust hazards to minimize secondary explosion potential.

### Section 8. Exposure Controls/Personal Protecction

Occupational Exposure Limits

Ingredient Name	ACGIH TLV	OSHA PEL	STEL
Distillates (petroleum), hydrotreated middle	5 mg/m3	5 mg/m3	10 mg/m3
Amorphous silica	10 mg/m3	6 mg/m3	Not Est.

Personal Protective Equipment

Goggles, Gloves

Respiratory Protection

No respiratory protection should be needed with good local

ventilation.

Skin Protection

Wash at mealtimes and end of shift. Contaminated clothing and shoes should be removed as soon as practical and throughly closed before rouse. Chamical protective gloves are

cleaned before reuse. Chemical protective gloves are recommended. Suitable Gloves: Silver Shield 4H

Eye Protection
Exposure Controls

Safety goggles or glasses with side shields are recommended.

Acetic acid is formed upon contact with water or humid air. Provide adequate ventilation to control exposures within guidelines of OSHA PEL: TWA 10 ppm and ACGIH TLV: TWA 10 ppm, STEL 15

ppm.

Note

These precautions are for room temperature handling. Use at elevated temperatures or aerosol/spray applications may require added precautions. For further information regarding aerosol inhalation toxicity, please refer to the guidance document regarding the use of silicone-based materials in aerosol applications that has been developed by the silicone industry

(www.SEHSC.com).

### Section 10. Stability and Reactivity

Conditions to Avoid None known Hazardous Will not occur

Polymerization

Incompatibility

Chemical Stability Stable

Materials to Avoid / Oxidi

Oxidizing material can cause a reaction. Water, moisture or humid air can cause hazardous vapors to form as described in Section 8.

### Section 11. Toxicological Information

Special Hazard Information on Components

No known applicable information.

### Section 12. Ecological Information

**Environmental Effects** Complete information is not yet available. Environmental Fate and Complete information is not yet available.

Distribution

Fate and Effects in Complete information is not yet available.

Waste Water Treatment

**Plants** 

### Section 13. Disposal

Waste Disposal Method We make no guarantee or warranty of any kind that the use or disposal of this product complies with all local, state, or federal laws. It is also the obligation of each user of the product mentioned herein to determine and comply with the requirements of all applicable statutes. This product is not known to be regulated under RCRA regulations. Disposal of unused portions of this product and process waste containing this product should be done only after a careful evaluation and in compliance with all federal, local and state laws.

## Section 14. Transport Information
