 Avoid contact with the eyes and skin.

Respiratory protection
 In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

Protection of hands
 The glove material has to be impermeable and resistnat to the product/the substance/the preparation.
 Due to missing tests no recommendation to the glove material can be given for the product/the preparation/the chemical mixture.
 Selection of the glove material on considration of the penetration times, rates of diffusion and the degradation.

Material of gloves
 The selection of suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be

checked prior to the application.
 Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
