## Section 6. Accidental Release Measures

Steps to be taken in case of spill or release	<p>Determine whether to evacuate or isolate the area according to your local emergency plan. Observe all personal protection equipment recommendations described in Sections 5 and 8. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. For small spills, wipe up or scrape up and contain for salvage or disposal. Clean area as appropriate since spilled material, even in small quantities, may present a slip hazard. Final cleaning may require the use of steam, solvents or detergents. Dispose of saturated absorbent or cleaning materials appropriately, since spontaneous heating may occur.</p> <p>Local, state and federal laws and regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which federal, state and local laws and regulations are applicable. Sections 13 and 15 of this MSDS provide information regarding certain federal and state requirements.</p>

## **Section 10. Stability and Reactivity**

Chemical Stability          Stable  
Hazardous polymerization Will not occur  
Materials to Avoid / Incompatibility      Oxidizing material can cause a reaction.  
Conditions to Avoid      None known

## **Section 11. Toxicological Information**

Special Hazard Information on Component      Methyl Oximino Silane (22984-54-9) Possible skin sensitizer  
Vinyl Oximino Silane (2224-33-1) Possible skin sensitizer  
Component Toxicology Information      Methyl Ethyl Ketoxime (MEKO) is formed upon contact with water or humid air. Male rodents exposed to MEKO vapor throughout their lifetime developed liver tumors. Since many commonly used chemicals cause liver tumors in rats and mice, additional testing is planned by the MEKO supplier to determine any relevance to humans. Until more data is known, exposure levels should be maintained as low as achievable.
